Dublin City University
School of Computing

APPLICATION FOR APPROVAL OF AN UNDERGRADUATE OR TAUGHT MASTERS PROJECT INVOLVING **HUMAN PARTICIPANTS**

_____

Please read the following information carefully before completing and submitting your application.

- **Applications must be submitted via the project dashboard**

- **Student applicants must include their supervisor as the Principal Investigator (PI).** The form should be checked, approved and signed in digital form by the supervisor in advance of submission.

- **The application should consist of <u>one electronic file only, in PDF format,</u>** with an electronic signature from the PI (the project supervisor) and yourselves, the students. The completed application must incorporate all supplementary documentation, especially those being given to the proposed participants.

- **All sections of the application form must be answered as instructed and within the word limits given.**

Applications must be completed on the form; answers in the form of attachments will not be accepted, except where indicated. No hardcopy applications will be accepted. **The project <u>must not</u> commence until approval has been received from the School Research Ethics Committee.**

PROJECT TITLE	CA400 Final Year Project: GeoMelody
PRINCIPAL INVESTIGATOR(S) _The Principal Investigator is the project supervisor and s/he has primary responsibility for the project._	Tomas Ward
START AND END DATE	10/11/2022 - 28/04/2023
STUDENT NAME(S), COURSE AND YEAR (E.G. EC4)	Christopher Cussen: 19424146 Ali Mazbouh: 18372503 4th year CA students
LEVEL OF RISK _Please confirm that this project requires notification only_	Notification only: YES / NO

1.   ADMINISTRATIVE DETAILS

1.1   WILL THE PROJECT BE UNDERTAKEN ON-SITE AT DUBLIN CITY UNIVERSITY?

YES or NO
No

==If NO, state details of the off-campus location – provide details of the approval to gain access to that location in section 2.7.==

Most of this project's development was undertaken at the homes of our respective team members

DECLARATION BY PRINCIPAL INVESTIGATOR / SUPERVISOR

The information contained herein is, to the best of my knowledge and belief, accurate. I have read the University's current research ethics guidelines, and accept responsibility for the conduct of the procedures set out in the attached application in accordance with the form guidelines, the REC guidelines (https://www.dcu.ie/researchsupport/researchethics.shtml), the University's policy on Conflict of Interest, Code of Good Research Practice and any other condition laid down by the Dublin City University Research Ethics Committee. I have attempted to identify all risks related to the project that may arise in conducting this project and acknowledge my obligations and the rights of the participants.

If there exists any affiliation or financial interest for researcher(s) in this project or its outcomes or any other circumstances which might represent a perceived, potential or actual conflict of interest this should be declared in accordance with Dublin City University policy on Conflicts of Interest.

I and my co-investigators and/or supporting staff have the appropriate qualifications, experience and facilities to conduct the project set out in the attached application and to deal with any emergencies and contingencies related to the project that may arise. Supervisor(s) signature(s) are required as evidence that they have read and approve the submission.

Please note:

1. *Any amendments to the original approved proposal must receive prior School Ethics Committee approval.*

2. *As a condition of approval investigators are required to document and report immediately to the School of Computing Ethics Committee any adverse events, any issues which might negatively impact on the conduct of the project and/or any complaint from a participant relating to their participation in the study*

Electronic Signature(s):

DocuSigned by:

Principal investigator / Supervisor: ___Tomas Ward_____

Print Name(s): Chris Cussen, Ali Mazbouh
Date:13/03/23

2. PROJECT OUTLINE

2.1 LAY DESCRIPTION, AIMS & JUSTIFICATION, METHODOLOGY *(up to.100 words)*
Please outline, in terms that any non-expert would understand, what your project is about, including what participants will be required to do. Please explain any technical terms or discipline-specific phrases. State the aims and significance of the project.

> For our project we decided to create a progressive web application which will take audio input through a mobile phone and will then use an existing API like Aud-D to identify the inputted song, record where and when the user inputted the audio into the PWA, and display information on both the song and the artist. We also plan to implement neural network technologies to reduce any unwanted noise in the recording to improve the system's ability to identify a song playing in a noisy environment.
>
> While similar applications do exist, like Shazam for example, this project will be a progressive web application which not only identifies the song for you, but will be able to store every song you identify in a database accompanied by a timestamp of when you recorded the audio and where. This will make it easier for the user to remember which song they heard when they try to find the song later on. As well as this, the web app will recommend similar artists for the user to listen to based on the song that was recorded.
>
> Our reasoning for implementing this service as a progressive web application over a mobile application is that we want the service to be as easily accessible as possible. If a user is at a music festival, for example, and hears a song that they like but do not know they will only have a very finite amount of time to identify the song before it ends and their chance is gone. PWA's require no download and so if a user wants to identify a song but hasn't got the app, the likelihood that they succeed in this is greater if the service is available instantly on the web. Also, PWA's implement progressive improvement principles and so the service will work for any user regardless of their preferred browser. So whether it's an Android phone or IOS, the service will be instantly available.
>
> Keywords:
> **Progressive Web Application (PWA)** → An application designed to utilise modern Web capabilities to provide users with a better experience than a traditional native application. Essentially a hybrid between a mobile application and a regular web page that runs inside a web browser and can be viewed as a website anchored by CSS, HTML, or other web-related standards and have the same look and feel as typical native apps.
>
> **Graphical User Interface (GUI)** → The front end of a computer application that the user interacts with and is meant to create a user-friendly environment so the application is simpler to use.
>
> **Application programming interface (API)** → A mechanism that allows for two pieces of software to communicate and interact with each other. The client (application user) sends a request to a server and receives a response via an API.

2.2 PARTICIPANT PROFILE
List and very briefly describe each participant group where applicable. For instance, participant group 1 will consist of…, participant group 2 will consist of… etc. Indicate if minors (Under 18) are involved *Provide the number, age range and source of participants. Please provide a justification of your proposed sample size.*

> **Participant group 1** will consist of fellow 4ᵗʰ Year students
>
> **Participant group 2** Will consist of older participants (approximately 50 years old) to test the app on as an older age group of participants might not be as technologically capable as a younger participant. This will give us an indication on how user-friendly our PWA is.

2.3 PARTICIPANT RECRUITMENT
Please provide specific details as to how you will be recruiting participants. How will people be informed that you are doing this research? How will they be approached and asked if they are willing to participate? If you are mailing or phoning people, please explain how you have obtained their names and contact details. If a recruitment advertisement (e.g. through social media, if so include the text at the end of the form) is to be used, please ensure you attach a copy to this application (Approx. 100 words).

For participant group 1: We will contact students in our course via email. Using fellow CA students will give us valuable insight into potential improvements that could be made to the app. We will obtain their emails through the course email list.

For participant group 2: We will both advertise our need for older test subjects on our social media, informing all readers of the relevant information regarding the testing process.

2.4I   IS IT LIKELY THAT ANY PARTICIPANTS COULD BE CONSIDERED POTENTIALLY VULNERABLE?
Are some or all participants vulnerable in any way? (e.g by virtue of the group they belong to, people who have undergone traumatic or adverse emotional events, people with diminished cognitive ability, power relations between students and participants etc.)?

YES or NO
No

If Yes, please state and describe what this vulnerability (or vulnerabilities) is and justify why this research is being done with such participants

2.5   WILL THE IDENTITY OF THE PARTICIPANTS BE PROTECTED?

YES or NO
Yes

If NO, please explain why

IF YOU ANSWERED YES TO 2.5, PLEASE ANSWER THE FOLLOWING QUESTION:

2.6   HOW WILL THE ANONYMITY OF THE PARTICIPANTS BE RESPECTED?
Please bear in mind that where the sample size is very small, it may be impossible to guarantee anonymity/confidentiality of participant identity. Participants involved in such projects need to be advised of this limitation in the Plain Language Statement/Information Sheet. If you intend to fully anonymize the data, please provide details

We will use online surveys to obtain feedback from our participants while maintaining full anonymity for all of our participants

2.7   LEGAL LIMITATIONS TO DATA CONFIDENTIALITY
*Participants need to be made aware that confidentiality of information provided cannot always be guaranteed by researchers and can only be protected within the limitations of the law - i.e., it is possible for data to be subject to subpoena, freedom of information claim or mandated reporting by some professions. **This information should be included in your Plain Language Statement and Informed Consent Form.** Depending on the project proposal and academic discipline, you may need to state additional specific limitations.*

State how and where participants will be informed of these limitations

We will have a form explaining all of this relevant information at the start of the survey

2.8(a)   EXPLAIN HOW PARTICIPANTS ARE TO BE RECRUITED

We will recruit our participants via email and online advertisement

2.8(b)   CHILD PARTICIPANTS (anyone under 18 years old)

Please indicate your compliance with the following guidelines:	Mark here
We confirm that we have read and agree to act in accordance with the DCU Child Protection policy and procedures	
We confirm that we have put in place safeguards for the children participating in the project	
We confirm that we have supports in place for children who may disclose current or historical abuse (whether or not this is the focus of the project)	

2.9   PLEASE EXPLAIN WHEN, HOW, WHERE, AND TO WHOM RESULTS WILL BE DISSEMINATED, INCLUDING WHETHER PARTICIPANTS WILL BE PROVIDED WITH ANY INFORMATION AS TO THE FINDINGS OR OUTCOMES OF THE PROJECT*?*

2.10   ARE OTHER APPROVALS REQUIRED TO GAIN ACCESS TO ANOTHER LOCATION, ORGANISATION, SCHOOL ETC.?

YES or NO
…

3.   RISK AND RISK MANAGEMENT

3.1   EXPLAIN AND JUSTIFY THE STATED LEVEL OF RISK TO PARTICIPANTS

There is minimal risk to any participants taking place in the testing process as the app is simply a music recognition software. All confidential info asked of the participant (email, password, etc) will not be their true information, but merely a test email for them to use for the sole purpose of testing the app.

<div style="border: 1px solid black; min-height: 100px;"></div>

3.2 POTENTIAL RISKS TO PARTICIPANTS AND RISK MANAGEMENT PROCEDURES

Identify, as far as possible, all potential risks to participants (physical, psychological, social, legal, economic, etc.), associated with the proposed project. Will your project involve deception, investigation of participants involved in illegal activities, performance of any acts which might diminish the self-esteem of participants or cause them to experience embarrassment, regret or depression? Please explain what risk management procedures will be put in place to minimise these risks.

There are no physical, psychological, social, legal or economic risks involved with the participation of the testing process for this app.

3.3 ARE THERE LIKELY TO BE ANY BENEFITS (DIRECT OR INDIRECT) TO PARTICIPANTS FROM THIS RESEARCH?

YES or NO
No

If YES, provide details

3.4 ARE THERE ANY SPECIFIC RISKS TO YOURSELVES IN CARRYING OUT THIS PROJECT?

Examples include use of dangerous materials, asking certain types of questions,The project being undertaken in certain locations, researchers working alone in isolated areas, etc.

YES or NO
No

If YES, please describe and explain what risk management procedures will be put in place to minimise these risks

3.5 DEALING WITH ADVERSE/UNEXPECTED OUTCOMES

Please describe what measures/protocols you have put in place in the event that there are any unexpected outcomes or adverse effects to participants arising from involvement in the project.

We agree to regularly meet with our supervisor to monitor the project and enable them to help deal with unexpected outcomes, and this will provide support for participants and monitor the project

YES or NO
…

3.6 SUPPORT FOR PARTICIPANTS

Depending on risks to participants you may need to consider having additional support for participants during/after the study. Consider whether your project would require additional support, e.g., external counselling available to participants. Please advise what support will be available.

There is no need for any additional support

3.7   HOW WILL THE CONDUCT OF THE PROJECT BE MONITORED?
Please explain how the principal investigator will monitor the conduct of the project (especially where several people are involved in recruiting or interviewing, administering procedures, etc.) to ensure that it conforms with the procedures set out in this application. In the case of student projects please give details of how the supervisor(s) will monitor the conduct of the project.

We will meet regularly with our project supervisor before the testing process begins to go over what sort of conduct is most appropriate for this testing process to be successful and risk free for the participant

3.8   DO YOU PROPOSE TO OFFER PAYMENTS OR INCENTIVES TO PARTICIPANTS?

YES or NO
No

If YES, please provide further details

3.9   DO ANY OF THE RESEARCHERS ON THIS PROJECT HAVE A PERSONAL, PHILOSOPHICAL, FINANCIAL, POLITICAL, IDEOLOGICAL, OR COMMERCIAL INTEREST IN ITS OUTCOME THAT MIGHT INFLUENCE THE INTEGRITY OF THE PROJECT OR BIAS THE CONDUCT OR REPORTING OF THE PROJECT, OR UNDULY DELAY OR OTHERWISE AFFECT THEIR PUBLICATION?

YES or NO
No

If YES, please specify how this conflict of interest will be addressed

4. PERSONAL DATA - COMPLIANCE WITH THE GENERAL DATA PROTECTION REGULATION (GDPR)

Applicant declaration:

0	I understand that the proposed project, as set out in this form, is to be carried out by me in my capacity as a student of Dublin City University.	Yes	….

Definition of Personal Data

Personal data is any information about a living person, where that person is either identified or could be identified, from the data itself or when it is combined with other data. Typical examples of personal data in a research context are:

a) paper based records e.g. consent forms, research participant files, patient records, interview notes etc.

b) electronic records e.g. database of participant details, online survey returns, photos, audio & visual recordings, IP addresses, diagnostic / clinical imaging etc.

c) other e.g. genetic data, biometric data, clinical or medical samples etc.

Note: If personal data is to be obtained and / or processed in the course of the proposed research then there are certain legal obligations and principles to be followed. These are set out in the EU 2016 General Data Protection Regulation (GDPR) and associated Irish Law.

Any data that is <u>fully and completely anonymous</u> is not considered to be 'personal data'. However, any data that is merely pseudo-anonymised is deemed to be 'personal data'.

Further information on data protection issues is available from the University's Data Protection Unit (DPU). You should also consider consulting with your Unit's GDPR Advocate for help and advice on filling out this section of the form.

4.1   ASSESSING DATA PROTECTION RISKS & REQUIREMENTS

(A) Your knowledge of Data Protection		
Have you taken and completed the online data protection training course ('Data Protection Course') that is available to all staff and students through the DCU Loop System?	No	….

If you answered 'No' to the previous question then the DPU strongly recommends that all applicants complete the course on Loop before completing section # 4 of the REC Application Form.

If you experience difficulties in accessing the Loop course at the link above, please contact the Teaching Enhancement Unit for assistance.

	(B) Initial Assessment of whether any of the data to be used in the proposed research is 'Personal Data' (see definition above)		
1	**Will the proposed research include living human subjects?** *Rationale – personal data applies only to living individuals.*	**YES**	….
2	**Will the proposed research use any data that can be linked to an identified, or an identifiable, person?** *Rationale – to be personal data it must be possible to associate it with an identified, or an identifiable, living person.*	**No**	….
3	**Will the proposed research use any data identifiers that can be linked to a living person? Examples are a participant's name, code or ID number, their address, their IP address etc.** *Rationale: fully anonymised data is not deemed to be 'personal data' but data that has been deemed to be merely pseudo-anonymised is deemed to be 'personal data'.*	**NO**	….

If you answered 'Yes' to any of the questions 1 to 3 in sub-section (B), then continue to sub-section (C) and answer questions 1-8. If you answered 'No' to all of the questions 1 to 3 in sub-section (B), then proceed directly to section # 5 of this Application Form.

	(C) Assessing the degree of risk inherent in the personal data		
1	**Will the proposed research involve the use of personal data on individuals that reveals any of the following attributes or characteristics about them?** **(State 'Yes' or 'No' as appropriate to all of the following)**		
	Racial or Ethnic Origin	**NO**	….

		Political Opinions	**NO**	….
		Religious or Philosophical Beliefs	**NO**	….
		Trade Union Membership	**NO**	….
		Genetic Data	**NO**	….
		Biometric Data	**NO**	….
		Data Concerning Health	**NO**	….
		Data concerning a Person's Sex Life or Sexual Orientation	**NO**	….
2	**Will the proposed research involve the use of <u>personal data</u> relating to children or vulnerable individuals?** *A child, for data protection purposes, is defined as an individual below 18 years of age. Where the processing relates to 'electronic marketing' the age limit is reduced to 16 years. A vulnerable individual may be anyone who is unable to consent to, or to oppose, the processing of his or her data for any reason, including disability.*		**NO**	….
3	**Will the proposed research involve the use of data relating to an individual's criminal convictions and / or offences?**		**NO**	….

4	**Will the proposed research involve the large-scale processing of <u>personal data</u>?** *This may include: a wide range or large volume of personal data; processing which takes place over a large geographical area; processing where a large number of people are affected (e.g. over 100 individuals); or where the processing is extensive or it has potential long-lasting effects on individuals.*	**NO**	….
5	**Will the proposed research involve any form of <u>automated processing</u> of personal data?** *In particular, to analyse or predict aspects concerning that person's performance at work, economic situation, health, personal preferences, interests, reliability, behaviour, location or movements.*	**NO**	….
6	**Will the proposed research involve the sharing or transferring of any personal data to a 3rd party outside of DCU?** *For example, other research partners, providers of translation or transcription services, etc.* *For clarity, this question is not intended to refer to any standard software services already provided by DCU, for example the university's email system or its cloud-based storage provider (Google Drive).*	**NO**	….
7	**Will the proposed research require the sharing or processing of personal data outside the EU or the EEA? (e.g. the US, the UK, Canada, Australia, China etc.)** *The EEA refers to the 'European Economic Area' (i.e. the EU plus Norway, Liechtenstein and Iceland).*	**NO**	….

8	Will the proposed research involve the matching or combining of separate datasets of information on individuals in a way that would exceed their reasonable expectations of privacy? *This is especially important where two or more previously anonymous datasets are combined in such a way so as to allow for the identification of individuals. An example would be combining mobile phone location data along with any other dataset to identify individuals.*	NO	….

Important Point: Next Step

If you answered 'Yes' to one or more of the questions 1 to 8 in sub-section (C) You should consult with your Supervisor / Principal Investigator to who will assess whether there are any further data protection issues to be addressed or additional procedures to be followed.

Note 1: What does 'Minor' and 'Vulnerable Individual' mean?

A **minor** is defined as an individual below 18 years of age. Where the processing relates to 'electronic marketing' the age limit is reduced to 16 years. A **vulnerable individual** may be anyone who is unable to consent to, or oppose, the processing of his or her personal data for any reason. Both of these are of particular importance if the project compels the provision of data from individuals.

Note 2: What does 'large scale processing' mean?

The GDPR does not define what constitutes large-scale. EU guidance recommends that the following factors, in particular, be considered when determining whether the processing is carried out on a large scale:
- the number of data subjects (either as a specific number or proportion of the relevant population);
- the volume of data and/or the range of different data items being processed;
- the duration, or permanence, of the data processing activity; &
- the geographical extent of the processing activity.

Examples of large-scale processing include, but are not limited to:
- processing of patient data in the regular course of business by a hospital;
- processing of travel data of individuals using a public transport system (e.g. tracking via travel cards);
- processing of real time geo-location data of customers of an international fast food chain for statistical purposes by a processor specialised in these activities;
- processing of customer data in the regular course of business by an insurance company or a bank;
- processing of personal data for behavioural advertising by a search engine; &
- processing of data (content, traffic, location) by telephone or internet service providers.

Examples that do **not** constitute large-scale processing include, but are not limited to:
- processing of patient data by an individual physician; and
- processing of personal data relating to criminal convictions and offences by an individual lawyer.

B. Applicant Data Protection Assessment Questionnaire – Part II			
5(a)	Does your project include the use of Personal Data of individuals which reveals any of the attributes or characteristics below? If 'Yes,' please indicate which will be used in your project **(tick all that apply):**	NO	….

	racial or ethnic origin	**NO**	**….**
	political opinions	**NO**	**….**
	religious or philosophical beliefs	**NO**	**….**
	trade union membership	**NO**	**….**
	genetic data	**NO**	**….**
	biometric data	**NO**	**….**
	data concerning health	**NO**	**….**
	data concerning a natural person's sex life or sexual orientation	**NO**	**….**
5(b)	Does your project include the use of Personal Data relating to minors or vulnerable individuals? *(See **Note 1**, below)*	**NO**	**….**
6	Does your project include the use of Personal Data of individuals relating to their criminal convictions and/or offences?	**NO**	**….**
7	Does your project include large-scale processing of personal data relating to living individuals? *This may include: a wide range or large volume of personal data; processing which takes place over a large geographical area; or where a large number of people are affected (e.g. over 100 individuals); or where the processing is extensive or has long-lasting effects. (See **Note 2**, below)*	**NO**	**….**
8	Does your project include any form of automated processing of personal data, used to evaluate certain personal aspects relating to a living individual? *In particular, to analyse or predict aspects concerning that person's performance at work, economic situation, health, personal preferences, interests, reliability, behaviour, location or movements*	**NO**	**….**
9	Does your project include any partners which are third parties outside of DCU? *e.g. Research partners, third party software providers or other providers such as translation or transcription services, etc.*	**NO**	**….**
10 (a)	Does your project involve the sharing or processing of Personal Data outside the EU or the EEA? *i.e. the EEA is the European Economic Area (the EU plus Norway, Liechtenstein and Iceland)*	**NO**	**….**

10 (b)	If 'Yes', please state which non-EU or EEA country is involved:		
11	Does the project require the matching or combining of separate datasets of information on individuals in a way that would exceed their reasonable expectations of privacy? *An example would be combining mobile phone location data along with any other dataset to identify individuals.*	NO	….

If you answered 'Yes' to one or more of these questions, you should make sure that you have strong and secure data privacy risk mitigation safeguards in place, discuss these with your supervisor.

4.2   WILL ANONYMISATION OR PSEUDONYMISATION OF THE PERSONAL DATA, WHERE APPLICABLE, BE UNDERTAKEN?
Anonymisation is the process of removing personal identifiers, both direct and indirect, that may lead to an individual being identified. Pseudonymisation is the processing of personal data in such a manner that the personal data can no longer be attributed to a specific living individual without the use of additional information, provided that such additional information is kept separately and is subject to technical and organisational measures to ensure its security.

YES or NO
Yes

If YES, please explain below the methods by which you intend to anonymise/pseudonymise the personal data:

> The user will be asked to input an email and password for testing the user-specificity aspect of the project, however, this information should not be their true information. Instead, they will use "dummy data", and this will be explained to each participant before the testing process begins.

5.   DATA/SAMPLE STORAGE, SECURITY AND DISPOSAL

For the purpose of this section the term 'Data' includes personal data that is in a raw or a processed state (e.g. interview audiotape, transcript or analysis, etc.). The term 'Samples' include body fluids and/or tissue samples.

5.1   HOW AND WHERE WILL THE DATA/SAMPLES BE STORED?
DCU recommends that any data stored electronically offsite should utilise the DCU Google Drive. Alternative offsite storage will need to be justified and must meet data protection and GDPR compliance requirements.

> **The data samples will be stored in a database that only team members will have access to (Christopher Cussen and Ali Mazbouh)**

5.2   WHO WILL HAVE ACCESS TO DATA/SAMPLES?
If people other than the main researchers have access, please name who they are and explain for what purpose.

> **Only the project development team members**

5.3   HOW LONG IS THE DATA TO BE HELD OR RETAINED?
Note that, with very few exceptions, Personal Data may not be retained indefinitely. It is up to the project team to establish an upper retention limit for each category of Personal Data used within the project and to ensure it is applied at the expiry of that limit. The School of Computing Research Ethics Committee recommends that Personal Data is retained until after the Progression and Awards Board for the current academic year.

The data will only need to be retained in the database during the testing process of the app, respective to each participant

5.4 IF YOUR PROJECT DOES INVOLVE THE USE OF PERSONAL DATA THEN WILL THIS BE USED AT A LATER DATE FOR THE PURPOSE OF PUBLICATION OF THE RESULTS OF THE PROJECT?

YES or NO
...

Where it is intended that the personal data used in the project will be used at a later date for the purposes of publication please explain how consent to do so will be obtained.

There will be no need to share the user's data, it will be deleted soon after testing

5.5 IF THE DATA/SAMPLES ARE TO BE DISPOSED OF AT THE END OF THE PROJECT PLEASE EXPLAIN HOW, WHEN AND BY WHOM THIS WILL BE DONE?

*Note that simply deleting files is not sufficiently secure. The additional steps to be taken to maintain data security should be given. **Personal data** must be disposed of in a safe and secure manner at the end of its retention period. If the data is stored in (a) a paper-based format, then shredding or disposal via a secure bin is recommended; or (b) in an electronic-based format, then deletion of the record or the full anonymization of the data is recommended. If data/samples are **not** being disposed of, please justify that intention.*

How will the data/samples be disposed of? Please describe the means by which the personal data will be deleted or destroyed. This includes personal data held in hard copy and digital formats.	They will be deleted directly from the database
By whom will the data/samples be disposed? Please indicate the designated team member(s) with responsibility for deletion and/or destruction of the research project's personal data.	By one of the project development team members

6.   PLAIN LANGUAGE STATEMENT *(Attach to this document. Up to a max of 400 words)*

A Plain Language Statement (PLS) should be used in all cases. This is written information in plain language that you will be providing to participants, outlining the nature of their involvement in the project and inviting their participation. The PLS should specifically describe what will be expected of participants, the risks and inconveniences for them, and other information relevant to their involvement. Please note that the language used must reflect the participant age group and corresponding comprehension level– if your participants have different comprehension levels (e.g. both adults and children) then separate forms should be prepared for each group. The PLS can be embedded in an email to which an online survey is attached, or handed/sent to individuals in advance of their consent being sought. See link to sample templates on the website: https://www.dcu.ie/researchsupport/ethicsapproval.shtml

PLEASE CONFIRM WHETHER THE FOLLOWING ISSUES HAVE BEEN ADDRESSED IN YOUR PLAIN LANGUAGE STATEMENT/ INFORMATION SHEET FOR PARTICIPANTS:
Note that this list is a check-list of all of the things that you should include in your plain language statement, if they are relevant (they are in most cases). In the earlier sections of this form you have already written the text that can be used to create your plain language statement. References to the relevant sections are provided on each line.

	YES or NO
Introductory Statement (Student(s) and supervisor names, school, title of the project) [Table, p 1]	**Yes**
What is this project about? [section 2.1]	**Yes**
Why is this project being conducted? [section 2.1]	**Yes**
What will the participant be expected to do/have to do if they decide to participate in the study?[section 2.1]	**Yes**
How will their privacy be protected? [section 2.5, section 2.6]	**Yes**
How will the data be used and subsequently disposed of? [section 5.3]	**Yes**
What are the legal limitations to data confidentiality? [section 2.7]	**Yes**
Are there any benefits of taking part in the study? [section 3.3]	**Yes**
Are there any risks of taking part in the study? [section 3.2]	**Yes**
Confirmation that participants can change their mind at any stage and withdraw from the study [see plain language statement template, appendix 1]	**Yes**
How will participants find out what happens with the project? [section 2.9]	**Yes**
Contact details for further information [see plain language statement template, appendix 1]	**Yes**
	Yes

If any of these issues are marked NO, please justify their exclusion:

7.   INFORMED CONSENT FORM *(Attach to this document. Approx. 300 words, see appendices 2 and 3 for templates.)*

In most cases where interviews or focus groups are taking place, an Informed Consent Form is required. This is an important document requiring participants to indicate their consent to participate in the study and give their signature. In cases where an anonymous questionnaire is being used, it is not enough to include a tick box in the questionnaire. Participants should indicate their consent to each aspect of the research in a staged manner by checking mandatory checkboxes.
See link to sample templates on the website: https://www.dcu.ie/researchsupport/ethicsapproval.shtml

NB – IF AN INFORMED CONSENT FORM IS NOT BEING USED, THE REASON FOR THIS MUST BE JUSTIFIED HERE.

8. ASSENT FORM & PLAIN LANGUAGE STATEMENT FOR CHILDREN *(Attach to this document.)*

A child specific Plain Language Statement (PLS) should be used in project where children will be involved. The PLS must be written in a way that is understandable for children within your targeted age group. It also must state, in plain language, the nature of their involvement in the project and inviting their participation. The PLS should specifically describe what will be expected of participants, the risks and inconveniences for them, and other information relevant to their involvement. In addition, child participants should also be provided with an Assent Form. Parents/guardians will be provided with the Informed Consent Form, but each child should provide assent before taking part in the project. The Assent Form needs to be understandable to the age-group you are targeting. See link to sample templates on the website: https://www.dcu.ie/researchsupport/researchethics.shtml

NB – IF AN ASSENT FORM IS NOT BEING USED, THE REASON FOR THIS MUST BE JUSTIFIED HERE.

There will be no children used as participants for the testing process of this project.

9. SUBMISSION CHECKLIST *(Attach to this document)*

Please confirm that all supplementary information is included in your application (in electronic copy). If questionnaire or interview questions are submitted in draft form, please indicate this by putting (draft) after YES. A copy of the final documentation must be submitted for final approval when available.

My application has been collated as one electronic PDF file which includes the following documentation:	INCLUDED (mark as YES)	NOT APPLICABLE (mark as N/A)
Recruitment advertisement [consistent with section 2.3]	**Yes**	
Plain language statement/Information Statement [see section 6 and appendix 1]	**Yes**	
Informed Consent form [see appendices 2 and 3]	**Yes**	
Informed Assent form (children only)		N/A
Evidence of external approvals related to the research [see sections 1.1 and 2.10]	**Yes**	
Questionnaire/Survey	**Yes**	
Interview/Focus Group Questions		**N/A**

Dublin City University
Plain Language Statement

Study Title:
Geomelody
Dublin City University
Researchers:
Ali Mazbouh, 4th year CASE student DCU (ali.mazbouh3@mail.dcu.ie)
Christopher Cussen, 4th year CASE student DCU (christopher.cussen2@mail.dcu.ie)
Supervisor:
Tomas Ward (tomas.ward@dcu.ie)

Purpose of Research:
To test our mobile application and find and fix any issues or bugs found, see how users interact with the app when given no indication on how to use it.
Statement of when the research data is removed/deleted after a minimum period:
All data obtained from participants will be removed immediately after testing.
Details of what participant involvement in the Research Study will require:
Using the application and testing the music recognition features.
Potential risks to participants from involvement in the research study:
There is little to no risk involved, the data received from the participants will only be accessible to both researchers and is to be removed/deleted completely at the time stated above.
Benefits to participants (direct or indirect):
There was no incentive to be a participant aside from maybe learning a thing or two about the project we undertook and showing interest in it.
A statement that involvement in the Research Study is voluntary
All participants that participate in the testing are doing so voluntarily and have full right to change their mind at any time. All participants are engaging based solely on their willingness to participate.
How will participants find out what happens with the project?
Everyone that took part in testing for our project will be update by us, the researchers, on how the project went and how their participation helped us to complete our project.
If participants have concerns about this study and wish to contact an independent person, please contact:
The Secretary, Dublin City University Research Ethics Committee, c/o Research and Innovation Support, Dublin City University, Dublin 9. Tel 01-7008000, e-mail rec@dcu.ie

Clarification of the purpose of the study
The purpose of the study is to use different faces (i.e. you the participants) to test our facial recognition devices abilities and to see if it works with different ethnicities etc as we hope it will and doesn't indirectly discriminate against anyone.

Confirmation of particular requirements as highlighted in the Plain Language Statement

Participant – please complete the following (Circle Yes or No for each question)

I have read the Plain Language Statement (or had it read to me)	*Yes/No*
I understand the information provided	*Yes/No*
I understand the information provided in relation to data protection	*Yes/No*
I have had an opportunity to ask questions and discuss this study	*Yes/No*
I have received satisfactory answers to all my questions	*Yes/No*

Confirmation that involvement in the Study is voluntary:
I am fully aware that my participation in this study is voluntary
and I may withdraw at any moment.

Confirmation of arrangements to be made to protect confidentiality of data, including that confidentiality of information provided is subject to legal limitations:
I understand that all data I contribute is to be kept confidential and will only be used in the testing of this project.

Confirmation of arrangements regarding retention/disposal of data:
I understand that my data will be disposed of upon the completion of testing of the project. I understand that the only data I am sharing is images off my face and first name, the first name will be used as the name of the folder in which my images are stored. I need not give any email or further data.

Confirmations relating to any other relevant information as indicated in the PLS
I have read and understand all other relevant information as indicated in the PLS (Plain Language Statement).

Researchers Signature: *Ali Mazbouh, Christopher Cussen*

I have read and understood the information in this form. My questions and concerns have been answered by the researchers, and I have a copy of this consent form. Therefore, I consent to take part in this project
